Cytomegalovirus (CMV)
Concentrated and Prediluted Monoclonal Antibody Reagent
903-118-041619

Intended Use:
Analyte Specific Reagent. Analytical and performance characteristics are not established.

Summary & Explanation:
This antibody reagent is a mixture of two monoclonal antibodies that reacts with immediate early and early protein antigens in tissues infected with cytomegalovirus. This antibody does not react with herpes virus or human papilloma virus. In the later stage of infection, a cytoplasmic reaction may be observed.

Source: Mouse monoclonal
Clone: DT10 + BC90
Isotype: IgG2a + IgG1

Known Applications:
Immunohistochemistry (formalin-fixed paraffin-embedded tissues)

Supplied As:
Buffer with protein carrier and preservative

Storage and Stability:
Store at 2°C to 8°C. The product is stable to the expiration date printed on the label, when stored under these conditions. Do not use after expiration date. Diluted reagents should be used promptly; any remaining reagent should be stored at 2°C to 8°C.
