

c-erbB-2/HER2

Concentrated and Prediluted Rabbit Monoclonal Antibody
903-342-071423

BIOCARE
M E D I C A L

Available Product Formats				
Format	Catalog Number	Description	Dilution	Diluent
Concentrate	ACA 342 A, B	0.1, 0.5 mL	1:50	Da Vinci Green
Predilute	APA 342 AA, H	6.0, 25 mL	Ready-to-use	N/A
ONCORE	OAA 342 T60	60 tests	Ready-to-use	N/A
ONCORE Pro	OPAA 342 T60	60 tests	Ready-to-use	N/A
Q Series	ALA 342 G7	7.0 mL	Ready-to-use	N/A
UltraLine	AVA 342 G	6.0 mL	Ready-to-use	N/A

Intended Use:

Analyte Specific Reagent. Analytical and performance characteristics are not established.

Target Analyte: c-erbB-2/HER2

Source: Rabbit monoclonal

Clone: EP3 (previously known as EP1045Y)

Isotype: IgG

Supplied As:

Buffer with protein carrier and preservative

Storage and Stability:

Store at 2°C to 8°C. The product is stable to the expiration date printed on the label, when stored under these conditions. Do not use after expiration date. Diluted reagents should be used promptly; any remaining reagent should be stored at 2°C to 8°C.

Precautions:

1. This antibody contains less than 0.1% sodium azide. Concentrations less than 0.1% are not reportable hazardous materials according to U.S. 29 CFR 1910.1200, OSHA Hazard communication and EC Directive 91/155/EC. Sodium azide (NaN₃) used as a preservative is toxic if ingested. Sodium azide may react with lead and copper plumbing to form highly explosive metal azides. Upon disposal, flush with large volumes of water to prevent azide build-up in plumbing. (Center for Disease Control, 1976, National Institute of Occupational Safety and Health, 1976)¹
2. Handle materials of human or animal origin as potentially biohazardous and dispose such materials with proper precautions. In the event of exposure, follow the health directives of the responsible authorities where used.²
3. Never pipette reagents by mouth and avoid contacting the skin and mucous membranes with reagents and specimens. If reagents or specimens come into contact with sensitive areas, wash with copious amounts of water.³
4. This is an analyte specific reagent. Analytical and performance characteristics are not established.
4. Do not use reagent after the expiration date printed on the vial.
5. Follow local and/or state authority requirements for method of disposal.
6. The SDS is available upon request and is located at <http://biocare.net>.
